EDUCATION

CITY COLLEGE OF TAGAYTAY

BS Computer Science

Tagaytay, Cavite
2022–2026

General Weighted Average (GWA): 1.75 / 1.00 (Cum Laude); Dean's Lister, 2022–2024

Relevant Coursework: Web Development, UI/UX Web Design, Data Structures & Algorithms, and Software

Engineering, troubleshooting, and technical documentation.

FRONT-END DEVELOPMENT CODING BOOTCAMP

Remote, Philippines

Intensive training in HTML, CSS, JavaScript, responsive design, accessibility,

UI/UX DESIGNING BOOTCAMP

Remote, Philippines

Focused training in UI/UX design principles, wireframing, prototyping, typography, visual hierarchy, and user-centered design.

WORK EXPERIENCE

BANGKO MABUHAY

Junior Technical Support

Alfonso, Cavite
June 2025 – August 2025

- Provided technical support to employees by troubleshooting hardware, software, and basic network issues, helping maintain smooth day-to-day office operations.
- Assisted with computer and system setup, configuration, and basic maintenance to ensure employee workstations were ready for use.
- Diagnosed and resolved common workstation issues, minimizing disruptions and supporting reliable system performance.

Filinvest Land Philippines

Junior Software Developer

Remote, Cavite
March 2026 – August 2026

- Improved website performance and user experience across three Filinvest brands—Futura, Aspire, and Prestige by developing responsive features using Next.js, React, TypeScript, and Tailwind CSS.
- Increased page speed and reduced image-loading time by optimizing CMS-managed images, converting assets to WebP, and applying appropriate resizing and compression.
- Improved property discovery by building responsive property listings, search functionality, filtering, pagination, and reusable property-card components connected to Payload CMS APIs.
- Reduced UI inconsistencies across desktop and mobile devices by translating Figma designs into responsive, reusable components and coordinating design adjustments with senior developers.
- Improved application reliability by resolving hydration errors, TypeScript issues, build failures, and cross-browser UI bugs within a monorepo supporting three website applications.
- Streamlined content management across **three websites** by integrating frontend pages with Payload CMS REST APIs for dynamic projects, news articles, and general page content.
- Supported production readiness through Lighthouse audits, responsive testing, and accessibility improvements, achieving scores of **93 in Accessibility**, **92 in Best Practices**, and **92 in SEO** on the Filinvest Land homepage
- Improved production readiness across multiple pages for three Filinvest websites by conducting Lighthouse audits and implementing performance, accessibility, responsiveness, and cross-browser improvements.

FREELANCE

Front-end Web Developer

Remote, Philippines
2024 – 2026

- Built responsive websites using React, Next.js, JavaScript, HTML, CSS, and Tailwind CSS, delivering functional interfaces across desktop and mobile devices.
- Translated UI designs into clean, reusable front-end components while maintaining visual consistency and usability.
- Customized landing pages, portfolio websites, and e-commerce interfaces based on client requirements and project goals.

Full-stack Developer

2024 – 2026

- Led the end-to-end design and development of a full-stack mobile application, covering interface design, backend development, and database integration.
 - Built an AI-powered chatbot to automate responses and support inquiry management within the application.
 - Developed REST APIs using Node.js, Express, and MongoDB to manage application data and chatbot functionality.
- UI/UX Designer
- Designed responsive web and mobile interfaces using wireframes, prototypes, and high-fidelity Figma mockups.
 - Created reusable design systems to maintain visual consistency across devices.
 - Improved user flows, navigation, accessibility, and information hierarchy.
 - Collaborated with clients and developers to deliver practical, development-ready designs.

PROJECTS

Talk to Zein

- Developed a modern personal portfolio website showcasing projects, technical skills, professional experience, and contact information.
- Built with React/Next.js and responsive UI components, including interactive navigation and project-focused layouts.

Jetour Flight Booking System

- Developed a web-based flight booking system that allows users to search available flights, manage passenger information, and complete booking transactions.
- Designed responsive booking interfaces and integrated backend functionality for flight schedules, reservations, and customer data management.

STI Chatbot System

- Developed an AI-powered chatbot system designed to answer common student inquiries and provide automated assistance. Built chatbot workflows and backend functionality for managing responses, inquiries, and school-related information.

MAPUA DOCKING SYSTEM

- Developed a docking and monitoring system designed to manage device or equipment connections, availability, and status information.
- Created an organized interface and supporting system functionality to simplify monitoring and management of docking operations.

GLOBAL CURRENCY INVOICE PROCESSOR

- Developed a currency-based invoice dashboard that retrieves live exchange rates, converts multi-currency invoices, calculates outstanding balances, and persists invoice records locally.

GITHUB DEVELOPER ANALYST DASHBOARD

- Developed a currency-based invoice dashboard that retrieves live exchange rates, converts multi-currency invoices, calculates outstanding balances, and persists invoice records locally.

COUNTRY INTELLIGENCE AND WEATHER DASHBOARD

- Created a country intelligence dashboard that combines live geographic and weather data from multiple APIs, with search, regional filtering, sorting, detailed views, and persistent favorites.

ACTIVITIES

CAFFEINE AI HACKATHON

Web Developer Member

Quezon City
October 2025

- Collaborated with the team to develop and present an AI-based solution called “Bantay Bayan Pilipinas” A system for transparency of funds in Philippines.
